

The Environment: Our Policy Statement

Who are we?

Ingenious Power Engineering Limited is a professional Utilities, High & Low Voltage Consultant, Infrastructure Designer and Installer and High Voltage Substation builder serving all sectors.

Why is the environment important to us?

- Our business does not exist in isolation. Our employees, customers, suppliers, the local community and the global environment are all affected by what we do and how we do it.
- We consider ourselves to be proactive and considerate of the environment we work and live in.

Accordingly, we believe that we have a duty to reduce any negative impact and strive to continually contribute positively to the protection of our world.

What is our commitment to the environment?

We are firmly committed to preventing pollution, ensuring continuous improvement and promoting/achieving high standards of environmental performance during all of our works and activities.

To do this, we will ensure we comply with all applicable environmental legislation, industry, organisational and customer needs whilst promoting a proactive approach to reducing and managing our impact on the environment.

What are our objectives for the environment?

- Ingenious Power Engineering set environmental objectives and targets which are measured, monitored and reviewed to enable continuous quantitative improvement in our environmental performance, pollution prevention and environmental protection.
- We aim to continuously improve our utilisation of resources and management programmes.
- We are working hard to achieve a paper-free business environment which helps to reduce the amount of waste generated and the amount of energy used to carry-out our activities through effective energy management.

How do we comply with our responsibilities for the environment?

- Our Managing Director is responsible for ensuring that any environmental impact our company has on our world is positive. This is achieved through every member of staff engaged by our business.
- We have waste management minimisation and recycling programmes on site and in the office.
- We coach and train our people and make sure resources are available to enable responsible environmental management and behaviours. We aim to increase environmental awareness through office and site-based awareness initiatives.
- We provide all of our people with a comprehensive operational guidelines and communication systems.
- All of our people are responsible for ensuring high standards of environmental care.

- We actively promote a greener lifestyle in and outside of work, involving customers, partners, clients, suppliers and sub-contractors.
- We will attempt to reduce the consumption of raw materials and energy.
- We aim to source raw materials from sustainable sources at every opportunity.
- We look to improve the environmental efficiency of our transport and travel.
- We have implemented a Carbon Management programme in order to actively monitor and reduce our carbon emissions.
- The implementation of our business social network platform will help us to achieve our goal of a paper-free business environment.
- We monitor sub-contractors to ensure that they comply with the same environmental requirements as detailed in our environmental policy.
- Maintain 14001 Certification standards.

This Ingenious Power Engineering Policy Statement will be displayed prominently and be available to be view by all staff and any external persons who have an interest. It will be kept under review to ensure its continuing relevance.
